"Can't Afford to Paint."

The man who says that, forgets that painting properly done is economy, and the fact is he can't afford NOT to paint.
How often you require to paint is largely dependent upon the paint you use.

THE
SHERWIN-WILLIAMS
PAINTS

out last others. They are the most economical paints you can use, because they cover most and wear longest. Add to this their good appearance, and you have perfect paint—The Sherwin-Williams Paints.

They are made for many different kinds of painting. Whatever it is you want to paint—a house, or anything in or out of the house—we make the right paint for that particular purpose—not one slap-dash mixture for all.

SOLD BY

Farmers Union Branch

SAFE DEPOSIT VAULTS

The vaults of this bank are especially designed for the protection and safekeeping of your valuables, such as jewelry, stocks, bonds, deeds, promissory notes, insurance and other valuable papers that may be difficult or impossible to replace in case of loss.

Our Safe Deposit Boxes are of different sizes and may be rented individually or jointly by two or more persons.

They may be rented by the month or year, as preferred, and access to them may be had on every business day during banking hours.

Two keys are necessary to open a safe deposit box, renter's and our own, the latter being the Master Key and necessary to prepare the lock so that it may be opened by the key of the renter.

Patrons are afforded every facility for their convenience, comfort and privacy.

The Bank of Campbell

THESE COOL MORNINGS

are a gentle reminder that Fall is here and Winter approaching.

There's nothing so handy and comfortable as a New Perfection Oil Heater.

They begin to warm the room the moment you strike the match.

Piano for sale; good condition, 225 North Central Ave.

Dr. Cooper is reported as improving tho still unable to receive calls from the host of solicitous friends.

Mrs. W. S. Shelly went to San Francisco Friday on a pleasure and shopping visit, returning Tuesday.

Mr. and Mrs. J. E. Olds accompanied Mr. and Mrs. G. C. Bradford on their trip to San Francisco Friday.

All unclaimed dishes and belongings from the Floral Fete are at the Library, where the owners may obtain them.

Hugh Chauvin is confined to his home with developing symptoms of typhoid fever. Here's hoping he can fight it off.

Mrs. J. H. White of Berkeley, and Mrs. F. R. Castle of Watsonville are guests this week at the home of Mr. and Mrs. I. P. Beal.

Messrs. and Mesdames Bryon W. Gray and T. J. Henderson are among the prominent workers in the Bazaar being planned by the Rose Lawn church.

If the party, who unwittingly (?) carried off a box of Keith's correspondence cards, will call at Smith's, said Smith will be pleased to give him the decorated cover.

The Y. P. B's will have a bontire tonight (Friday) at 7 p. m. on the Keith lot on North Central avenue. A general invitation is extended, and a good time assured.

Judge R. H. Scott of Cheyenne, Wyo., is visiting friends and relatives in the community. He was much surprised at the many changes and improvements in Campbell.

The Moreland ladies will hold a bazaar and supper at their hall November 3rd, for the purpose of completing payment of the debt on the building. Supper 25c.

Born: To Mr. and Mrs. Chester Archibald, Saturday, a son, mother and baby doing nicely. Mrs. Archibald is here with her parents, Mr. and Mrs. G. L. Speigle. Father Archibald who is still in Reno, Nevada, is expecting his new son and heir to talk when he arrives.

Dr. W. I. Merrill's bulldog, Romper Boy, was awarded two blue ribbons at the Annual Show held in San Jose last week, one in the Novice Class, and one in the Limited Class, 22-29 pounds. Naturally he has assumed greater value, especially in the eyes of the small son.

A most delightful surprise was given the Country Woman's Club at its meeting Monday, when the president announced that "A Friend" had given \$25 to be added to the Library Building Fund. It was greeted with enthusiastic applause and thanks to the unknown giver.

The Rev. G. E. Atkinson has been elected president of the trustees of State Conference of Congregational churches and chairman of its Executive Committee. This is the first time a pastor of one of the so-called "smaller" churches has held that position. He is also member of the State Efficiency Committee and leader of the Contra Costa county team.

The chrysanthemum show at the Chamber of Commerce rooms in San Jose has been postponed to the 27th and 28th of October on account of the blossoms developing so slowly. Every resident of the valley who has chrysanthemums, whether many or few, plain or otherwise, is invited to exhibit. No charges, and each exhibit will be ticketed with the name of the variety and of the exhibitor.

Action Needed

To The Citizens of Santa Clara Co.:

Now that the work of putting the concrete pavement on Campbell avenue is about to be commenced, are the Supervisors of Santa Clara county going to give over to the dictation of the Southern Pacific Railroad, and allow the track to be left on the County Bridge and spoil 200 feet of the county highway?

About two years ago the Board of Supervisors granted the Peninsular Railroad permission to lay their tracks over the county bridge for a period of sixty days, until they could rebuild their bridge. For this accommodation the P. R. R. agreed to build a spur track into the creek bed for the County to get gravel. Have you seen the spur track? No. Nor that is not all. You never will.

Now are the Supervisors of Santa Clara County going to give this county bridge to the P. R. R. and discommode every citizen that drives over this bridge, as the P. R. R. cars do not stop for wagons or autos? If you want to cross the bridge you must wait until the cars gets across first.

How about this? Are the citizens of Campbell and Santa Clara County going to tolerate any such abuse? The County Roads are intended for the county citizens and they should be given the Right of Way.

A Citizen.

County Y.M.C.A. Convention At Campbell

The convention of the supporters of the Santa Clara County Y. M. C. A. was held at Campbell Thursday evening under the auspices of the state committee. W. D. McRae, secretary for county work, and Harry O. Hill, state student secretary, being present. The banquet served by the ladies of the Congregational and Methodist ladies was enjoyed at the Methodist church parlors after which the business of the hour was taken up. J. W. Snow called the meeting to order with a few appropriate remarks after which C. F. Hamsher of Los Gatos gave the toast to the ladies for their prominent part in making the meeting such a pleasant affair. Secretary McRae then gave an outline of the preliminary work done thus far. \$3250 has been pledged for the first year of the work and almost the same amount for the second year. The pledges were three years and the outlook is promising. Mr. McRae nominated the following committees which were elected: I. W. Snow, J. F. Duncan, Campbell; P. W. Parmelee, H. C. Hogen, Gilroy; John Edwards, F. W. Barber, Morgan Hill; C. F. Hamsher, E. B. Jennings, Los Gatos; Geo. L. Beaver, W. F. Miller, Palo Alto; W. A. Rice, B. V. Bazata, Saratoga.

The business meeting was interspersed with a musical program, the first number being a violin solo by Buel Walbridge of Los Gatos, who responded to an enthusiastic encore.

Mr. McRae then spoke on various subjects before given by him "Lest we forget." He stated that personal influence and leadership is the thing most needed in the county work. The work as begun is the best as shown by experience and the hearty co-operation of all is hoped for.

County secretary, S. Warren Douglas, then spoke of the problems of the work and the solution of them. The best way is for each man to use his influence to direct some particular boy in the proper paths and lead him to see aright. The boy problem resolves itself into a man problem as boys imitate older boys and men.

A musical number was then furnished by a male quartet: Messrs. Kammerer, Smith, Graves and Barron.

Mr. Harry Hill spoke on the work done in army quarters and in colleges today and stated that this work with the boys was of greatest importance. Other speakers were Messrs. G. L. Beaver of Palo Alto, J. F. Duncan, R. Allison, S. B. Smith and Edgar Kennedy of Campbell, Rev. Troxell and C. F. Hamsher of Los Gatos.

Herbert Roberts of Los Gatos, sang two pleasing numbers.

Honor Roll

First Grade:—Hadasah Withey, Geo. Mattos, Anita Strom, Miriam Blaine, Emma May Powell and Frank Ferro.

Second Grade:—Eddie Creigh, Viola Dowton, Eva Robinson, Marild Powell, Tony Sorissi and Oldrich Kalas.

Third Grade:—Harold Cramer, Russell Templeton, Lester Williams and Stella Rose.

Fourth Grade:—Elva Crawford, Marjorie Dunning, Ada Smith, Wilma Smith, Ida Williams, Carl Creigh, Manuel Homen and James Taylor.

Fifth Grade:—Helen Beal, Sophia Ferro, Irene Preston, Marie Fumort and Irvin Henry.

Sixth Grade:—Therma Glass, Leah Johnson, Pauline Blaine, Henrietta Toles, Alice Strom and Pauline Baker.

Seventh Grade:—Irene Toles, Edward Day, David Strom and Russel Crawford.

Eighth Grade:—Margaret Blaine, Lucile Strong and Georgia Cochran.

Kiddies Entertained

Mrs. I. P. Beal, the fairy God-mother to all babies, and the Pundita Circle kiddies in particular, gave a unique baby-party at her home in Sunny Oaks avenue, Saturday afternoon. The house was beautifully decorated in autumn colors, making a lovely setting for the charming hostess and the prettily dressed little ones.

While the children were enjoying their good time, the mothers were entertaining, as guest of honor, Mrs. M. E. Mumma, former secretary of the Pundita Circle.

Delicious refreshments were served by the hostess, assisted by Mrs. J. H. Stubbe.

The children present were Helen Beal, Harold Mumma, Ralph Stubbe, Norma Gill, Wilrose Watrous, Sabie Davidson, Clare Nelson, Norman McVea, Jeanne and Edith White of Berkeley, and Linden Castle of Watsonville.

Mrs. B. K. Denbigh and daughter are here from Berkeley for the week of school vacation.

Market Conditions

The price tendencies in staples are still generally upward. The best grades of flour are now, for 49 lb. sack, \$2.20. Sugar is 10 lbs. for \$1; by the sack \$8.10. Carnation Milk 10c straight. Alpine Milk 6 for 55c. Cottolene, 40c, 75c, \$1.85. Crisco 40c, 70c, \$1.30. Campbell's Soups 10c straight.

New Goods in Stock

Nat-A-Seed Raisins, new pack, 16 oz size; 15c, 2 for 25c. Del Monte Canned Tomatoes, new pack, No. 3 cans; 15c, 2 for 25c. Yosemite Brand Tomatoes, (pure) new pack, No. 2 1/2 cans; 10c, 3 for 25c. Magnolia Brand Shrimps, to sell at 10c. Cluff Brand Mince Clams, to sell for 10c. Canned Salmon, new pack; 10c, 15c 20c. Cluff Brand Tuna, new pack, 10c, 15c, 25c. New Crop Head Rice, unpolished, the best we have ever handled, 10c a lb., 3 lbs. for 25c. Oregon Potatoes, 2 1/2c a lb., cheaper by the sack.

Delineator Patterns

We order them for you by mail—your order to-day, the pattern is here to-morrow.

Quality stationery at Smith's.

The Fall Flower Show under the auspices of the Civic League of Los Gatos will be held for three days beginning Oct. 27th. Extensive preparations are being made and it will be as successful undoubtedly as the spring exhibit. Awards will be given for Amateur, School and Professional displays.

With the continued increase in the cost of living would it not pay you to consider these facts? One quart of Orange Grove Farm milk which costs you 8 1/2 cents delivered to your door is equal in food value to any of the following:—

3 lb. cheese worth	8 cents
8 eggs	30 "
3/4 lb. round steak worth	15 "
2 lb. chicken	45 "
2 lb. Salt codfish	30 "
4.8 lb. Turnips	9.6 "
2 1/2 lb. Apples	8 1/4 "

Not only is milk the cheapest food for you but when it is produced under sanitary conditions, from tested cows as ours is, it is the most healthful food obtainable.

WHAT BRITISH CONSOLS ARE

Not Bonds, as We Use Term, but Perpetual Obligations of the British Nation.

The British government debt really dates back to 1672, when it bore 6 per cent interest. Since then the major wars of the world have been recorded with more or less exactness in the fluctuations of interest return to investors in British bonds. Incidentally, a very ancient and honorable British institution is now apparently in the way of being extinguished. In the middle of the eighteenth century—about the time young George Washington was surveying in the wilds of Virginia—England's government debt was consolidated into a uniform issue bearing 3 per cent interest; hence arose the venerated name "consols," long boasted as the world's premier security.

War with the American colonies and with Napoleon sent consols down to 47 cents on the dollar, but by 1824 they were up to 96, and England settled back into a conviction that her government bonds, bearing not more than 3 per cent interest, were among the permanent phenomena of nature, says the Saturday Evening Post. Nearly a generation ago Mr. Goschen reduced the interest on consols to 2 1/2 per cent, then to 2 1/4 per cent, and at the latter rate they presently sold above par.

Consols are not really bonds, as we use the term, because the principal is not payable at all. They are the perpetual obligation of the British government, and the purchaser, instead of getting a sheet of engraved paper, with coupons attached, gets merely an entry on the Bank of England's books signifying that interest is payable to him.

Recently parliament authorized a loan of \$5,000,000,000 payable in 30 years and bearing 4 1/2 per cent interest. Consols are convertible into the new loan at the rate of 66 2/3 cents on the dollar, by which process they may disappear. What other ancient and honorable institutions the war may swallow up is problematical.

OLD AND NEW SWIMMING HOLE

That of the Present Day Cannot Obliterate Grandfather's Memories of His Youth.

Memory goes tracking back through the years to the old swimming hole. This one was on the "current side" of a great river, and the nadir of one of its majestic bends. Huge elm and oak trees grew on the bank and shaded waters whose limpid depths held such delights as nowhere else have been experienced. The smooth rock bottom of the river was ever washed clean while the white sand of the bit of beach along the shore was firm and grateful to the foot. This ideal spot was not easy to access, but the enterprising youth of the village found ample recompense in its joys for any exertion, even on the hottest day, required to reach it. Those who swam there, now grown gray, look at the homes that have invaded their happy land with some thoughts of sorrow.

The old swimming hole is only a cherished memory, remarks the Omaha Bee. Its wonderful freedom, in all ways appreciated by a healthy boy, is contrasted with the modern swimming hole, provided by a great city, mindful of the needs of its growing citizens. In this case it is a huge tank, set on the slope of one of the fine hills in a city park, surrounded by beautiful trees, a well kept lawn, and provided with all the appurtenances needful to the complete enjoyment of the holdest swimmer or most graceful or daring diver. It is a wonderful pool and the shouts of glee that come up from its surface these hot evenings testify most forcefully to the appreciation of old and young of privilege.

The new swimming hole is typical of the newer life into which the race is merging its existence, the urban rather than the rural. It is a regular step in the orderly progress of man's evolution, but its well appointed and equally regulated delights will never take the place of that splendid swimming hole nature provided for the use of boys, many of whom are now grandfathers.

Killing an Exact Science.

Said a man who knows mechanics as an open book: "The acme of preciseness and the perfection of all mechanism known to the human race is devoted to the art of killing men."

He was talking to me about the extreme exactness of range-finders for big guns—of which he has been asked to construct 100. "I know of no other thing in the wide domain of mechanics," said he, "that is worked out with so great care as these range-finders."

He told me that with that instrument it is possible to plant a shot within one yard of the desired target ten miles away. When I remarked that that required unusual delicacy, this scientist replied: "No, not delicate, because one of these finders weighs one hundred pounds, but they must be mechanically exact and perfect."

One might almost be tempted to say that killing men in war has become an exact science.—Philadelphia Ledger.

DOWN BRIGHT ANGEL TRAIL

DOWN Bright Angel trail straggle the hardy burros. Then up Bright Angel trail they scramble again. Part of the way their saddles were empty, where the trail clings so closely to the precipitous wall of the Grand canyon of the Colorado that there is no room for a rider to stick on. Winding its tortuous way upward, twisting about rocks, clutching the mountainside by inches, the trail gradually climbs the steep ascent from the river bed of the rushing Colorado to the heights above, 6,000 feet above, a mile straight up in the blue from the dark depths of earth's most wonderful treasure chasm of beauty.

You have not seen America until you have descended Bright Angel trail in Arizona, writes Earl William Gage in the Utica Saturday Globe.

Nowhere else on earth exists such a depression into the surface of the earth, from 1,000 to 6,000 feet deep. The canyon of the Yellowstone is trifling in comparison with the Grand canyon of the Colorado river in Arizona. The great gorge is 217 miles long, varying from 9 to 13 miles in width, the maximum depth being 6,000 feet. Here the tourist stands at the top of the mountain peak at the start and to gain the victory land must descend 6,000 feet of sheer rock. Elsewhere, we stand at the foot of the mountains and must ascend. At Grand canyon the rules that regulate tourists are reversed in everything.

"The Grand Canyon of the Colorado is the greatest thing in the world," says one writer. It is absolutely unparalleled and its beauties and grandeur are far beyond the grasp of the writer or the artist. More commanding than Yosemite or Yellowstone, more beautiful than majestic Niagara, more mysterious in its depth than the

racas, running east and west along the southern border of Utah. These have been carved by erosion out of the higher strata of the plateau and rise in huge steps northward to elevations of 11,000 feet or more. The southern border of this district is marked by an abrupt descent to lower country along a series of cliffs carved from the plateau strata.

The northern portion of the Grand Canyon district is divided into five minor platforms or plateau blocks by great lines of fracture or flexure, which trend north and south and are roughly parallel.

Long Series of Canyons.

The Colorado river crosses the plateau province from northeast to southwest. It has carved a series of canyons whose total length exceeds 500 miles. All these canyons are clear-cut, deep gashes in nearly level plateaus and their step-like walls descend abruptly by alterations of bold cliffs and narrow ledges. The river at the bottom carries the drainage from the whole western front of the Rocky mountains in Colorado and southwestern Wyoming. Because of the general impassability and inhospitable character of the bordering deserts, these canyons form a barrier to human travel more effective than the Rocky mountains. The Colorado river is unbridged for 700 miles, a distance about equal to the distance between New York and Chicago.

In the high-blocked plateaus of the Grand Canyon district the canyons reach their culmination in size and grandeur. The pathway of the river across these plateaus is the most remarkable valley in the world. The section that traverses the marble platform is known as the Marble canyon, being 60 miles in length. The part cut through the Kaibab, Kanab, Un-

LOOKING ACROSS GRAND CANYON

Himalayas in their majestic height, the Grand canyon remains the first natural wonder of the world.

Nature's Titanic Struggle.

While we may say that the Grand canyon is truly a canyon, it is rather an intricate system of canyons, each subordinate to the river channel in the midst. The river channel, lying more than 6,000 feet below the vision, seemingly is a rather insignificant trench, attracting the eye more by reason of its somber tone and mysterious suggestion than by any appreciable characteristic of the chasm. It is perhaps five miles distant in a straight line, and its uppermost rims nearly 4,000 feet beneath the observer, whose measuring capacity is entirely inadequate to the demand made by such magnitudes. Here some great battles of nature once took place, which have left its effect strikingly visible, yet of which we know nothing. The surrounding country looks for all the world like the mouths of a thousand still volcanoes, while the coating over the surface of the peculiarly shaped depressions is like volcanic ash in texture.

The Grand Canyon district lies in northwestern Arizona and coincides with a local uplift, or structural swell, in the Colorado plateau. Its area is about 16,000 square miles. Over practically all of this nearly level expanse one geologic formation, the Kaibab limestone, is surface rock. Along the eastern border of the district a sharp downward bend, known as a monocline, carries the beds to a lower level, where they resume their nearly horizontal attitude and continue eastward beneath the higher strata of the plateau. The upward edges of these higher faces are known as Echo cliffs.

On the north the district is walled in by another line of cliffs and ter-

karet and Sivwits plateaus is the Grand canyon proper. This is about 220 miles long, and averages a mile in depth and about ten miles in width, from rim to rim. The Kaibab and Kanab divisions are each about 50 miles in length, while the Uinkaret is 25 miles, and the Sivwits 75 miles.

Home of Old Cliff Dwellers.

Evidences of former human occupation are found everywhere in the Grand Canyon region, but as few of these ruins are well preserved there is nothing especially spectacular about them, save as of historic import. Here one time abounded crude stone houses. Some of these ruins are perched high under overhanging ledges which still show the blackening of the smoke from their fires; others lie among huge blocks of debris that have fallen from the cliffs; still others stand in the open, away from any natural shelter. The only well-preserved shelter are the old storehouses, built high up among the crevices in the canyon walls.

And into the depths of this wonderful land plunges Bright Angel trail, named by Major Powell. It is one of the few trails that permit human beings to enter the land of splendor. Almost everywhere huge walls of rock bar entrance to this cliff-protected chasm, where nature's God has wrought such marvels, which no man could equal.

New Use for Pulmotor.

The latest brand of fish story comes from Bethel, Me. On invitation of Mr. Bingham, a party left for Pennesseewassee lake for a day's fishing. The members got so many fish that on their way out they were stopped by the commissioner. They had more than the law allowed, so they turned back and resuscitated the surplus with a pulmotor put them back in the lake.

ENGLISH RULE IN GREEN ISLE

Dates From Twelfth Century, When Strongbow Invaded Country to Assist King of Leinster.

Visitors to the historical places and buildings of Ireland hear much talk of Strongbow. In the twelfth century, when Strongbow became famous, Ireland was divided into many small provinces, and each of these had its petty king. Dermot MacMurrough, who was king of the province of Leinster, was a very cruel and unpopular ruler, and he was so disliked and abused by his people and the neighboring rulers that he finally fled to England, where he begged King Henry II for help in subduing his enemies.

But Henry remembered that there were many other kings in Ireland and he refused to side with MacMurrough, though he gave permission to any of his subjects who liked, to go to Ireland and aid the Leinster king. A company of barons, therefore, left their barren lands in South Wales and crossed over to Ireland to win themselves rich lands there where soil was fertile. At the head of this band of barons was Richard de Clare, earl of Pembroke, who was known as Strongbow. They landed at Waterford, which city these barons straightway captured. Strongbow made his claim even stronger by marrying the daughter of Dermot MacMurrough. Then, learning that Dublin was just then struggling to free itself from the rule of the Danes, Strongbow made all haste in that direction, and soon he had taken the city by storm. Since that first landing and conquest by Strongbow and the other barons the English have always held more or less power over Ireland.

An old historian, named Cambrensis, gives us the following quaint description of the warrior Strongbow: "The earl was somewhat ruddy and of sanguine complexion and freckle-faced, his eyes grey, his face feminine, his voice small, and his neck little, but somewhat of a high stature. He was very liberal, courteous and gentle; what he could not compass and bring to pass in died, he would win by good words and gentle speeches. In time of peace he was more ready to yield and oblige than to rule and bear swaie. In all chances of war, he was still one and the same man, being neither dismayed with adversity nor puffed up with prosperity," a picture which hardly fits such a twelfth-century conqueror.—Christian Science Monitor.

Poker Chip Material Found.

It has been several years since open gambling was allowed in Texas and other parts of the Southwest. Even poker-playing is becoming an almost lost art. As an evidence of the falling off in this one-time great national game, it may be stated that few people realize that there now exists an unprecedented shortage of poker chips, due to the war across the seas. The knowledge of this threatened crisis has caused a world-wide search to be made for the mineral known as barite, which enters largely into the manufacture of poker chips. In the days before the foreign war barite came chiefly from Austria.

It is well known to mineralogists that the Llano region of Texas contains many rare and little-known metals. This fact caused a search for barite to be instituted, with the result that a large deposit of the metal has just been discovered in that district. The poker chip supply will soon be replenished from this new source of raw material.

Barite is also used in the enameling of iron and steel, the manufacture of paints, the coating of linoleums and oilcloths and the adulteration of sugar.

Three-Toed Horse Fossil.

A well-preserved set of teeth and jawbone of an animal which Prof. J. C. Jones of the Nevada State university declares were the property of a three-toed horse of the Upper Miocene age have been unearthed in the Washoe valley, on the Pedrol ranch, by university engineers.

Professor Jones says the horse probably roamed the wilds of Nevada some 3,000,000 years ago.

He says the horses of that date were even smaller than the Shetlands of the present day, and are classified as the eohippus. The specimens were found in a well which apparently penetrated a prehistoric lake bed. Teeth of mammoths, fossil leaves and other specimens of prehistoric ages have been found in wells on the Pedrol ranch. They are among the best in the fossil collection at the university, as they show clearly the age and classification to which they belong.

Brace Up!

"Brace up!" "You who sit all day in one position, square your shoulders and brace up." "The 'consumptive stoop' does not make for health, so brace up." "The slouch, the sag, the droop, the slump are poor guarantees of fitness. They endanger your health and your job. Brace up!"

"Don't bow your back and round your shoulders as if the burdens of life were too heavy. All loads will be lighter if you brace up."

These are a few of the paragraphs in a circular sent out by the Chicago health department.

Economies.

"Why don't you wear some of your last year's clothes?" inquired M. Crowcher.

"Why, father?" exclaimed his daughter; "didn't I have my last winter's furs made over and wear them all summer?"

CAIRO in WAR TIME

FROM the desert back to the town, to "the world," to the hurly-burly of Cairo and the fleshpots of Egypt. It is wartime, the summer of 1915. The city is full of soldiers, sunburned Australians and New Zealanders who have not yet been in action but are being kept lest the Arabs should come out of the desert and strive to efface the English and French civilization of the banks of the lower Nile and so add more ruins to the ruins of Egypt, writes Stephen Graham in Country Life.

The city is majestic with its broad streets, white stone palaces and stately mansions, its wondrous river and its mighty bridges. The dryness, cleanness and whiteness of a city that knows no rain; the city gleams in a vast supply of sunshine. The wind blows all the time from the desert, and wafts heat in the face as from a furnace. A city of life and gay energy. The fountain of life plays rapidly and brilliantly all the time, throwing up all colors, forms, faces. There is a sense of resplendent and tremendous gaiety. No one comes to Cairo to be an ascetic and mortify the flesh. But every building, every sight and sound says, "Life, life, life." All around is death—the desert which is death itself, the Pyramids which are tombs, the old cities and ruins which are the bodies of ancient civilizations passed away. But every sight and sound in the oasis of the great city says—Live, be gay, let the pulse beat fast, let the heart go and be glad, let the eyes sparkle and burn, let the lips form words of passion and pleasure.

There is a sense of an immense antiquity which, in contrast with the little second of the present moment, makes the latter less important, less holy. There is a subtle smell in the air, an odor that makes the head a little dizzy and

in Cairo, and every now and then the eyes rest on a native funeral procession, one procession, two processions, five processions, ten processions all following one another. They are in every street, and they go past with their strange pomp of death, with the body and the mourners and the keepers and professional howlers. The brightly living crowd on the footways each side of the road pause a moment and think, "Someone has died," and pass on, oblivious, intent on life. In luxurious hotels gentle and beautiful Nubians are handing out delicate fare, rich dishes cooked and served in that sought-out and magnificent style that Egypt has inherited from ages of epicureanism. And a wonderful assembly of officers and ladies, rich pleasure-seekers and tourists from the Mediterranean shores, invalids, receives—sitting at flower-decked tables in great halls.

A strange impression, in the afternoon, to go down the side streets and see the throngs of young men, unsteady on their feet but bright-eyed and thirsty-lipped, greedy, eager; the strong-limbed sunburnt colonial soldiers dancing with Arab girls, the cafe chantants, shooting saloons, bars, bad houses, the barrel organs, the smell of the air.

When Night Comes.

Night comes over the stately city, and the Europeans in their white clothes come in greater numbers into the streets. The great remote staring moon stands over the broad highway and arched bridges. Heat seems to be generated through the haze in the sky, but a light, dry breeze is ever blowing, and the pungent, sweetish odor of the city is in the nostrils. In the contrast of darkness and night silence the clangor of eastern music is more stirring. It stirs the body, not the soul, and is like the sensuous music of

THE ALABASTER MOSQUE

the hands a little feverish as you walk; it is the actual odor of antiquity, a finest dust in suspension in the wind, the dust of decay from past ages. All that dies in Egypt becomes dry, and only after centuries turns to dust and loses form. That which rots away in a year in our northern climate keeps its semblance for a thousand years in Egypt. The stones of the houses of native Cairo were many of them quarried by the ancients; the wooden beams and joists have lasted from the days of the Pharaohs, and only now are gently crumbling. Here the very stones can be used to manure the fields. Subtly, secretly, the seventh foundation is always crumbling away and passing in dust into the desert air. The smell in the air is partly the fine dust of mummies, of the bodies that were once erect and nervous and vivid, gay and felicitous and moving, the mysterious flocking humans of thousands of years ago.

Crowds in the Streets.

The streets roll forward with flocking crowds—dark faces, brown faces, sawn faces; red caps and straw hats and little turbans and smocks and burnous; negroes, Copts, Arabs, women in white veils, women with dark veils; Europeans, soldiers, hawkers, mendicants, post-card sellers, newspaper vendors. Along the center of the broad sun-swept roadways crash the electric trams; the rubber-tired cabs and wide-hooded victorias follow pleasantly; the motor cars proceed; the military auto-cycles pant; and the heavy ox and buffalo carts of the natives blunder along at the sides.

There is doing everywhere, happening, being. Voluminous and promiscuous action floods and surges through the city with the traffic. It is life everywhere. And yet mingled with life there is death. There is plague

Nebuchadnezzar, the music of cornet, flute, harp, sackbut, psaltery and dulcimer. Dark women with gold ornaments hang out from curtained windows or lurk just inside doorways and dark passageways, ready to coil snake-like upon a prey. In the roadways a shouting, calling crowd. In the taverns they are singing "Tipperary" and "We Won't Go Home Till Morning"; some men are standing on the tables, others are trying to put gawky Arab girls through the steps of a tango. The music jangles. The whole street has a collective voice, a strange tinkling and murmuring uproar.

A tall, lank, loose-jawed, genial Copt would show you the haunts of evil and offers his services to procure you pleasure. You have said "No" to him; he stands there where you left him on the pavement in his long cotton rags, smiling gently and cogitatively—the same type as stood in the city of the Pharaohs in the old days of the Israelitish bondage. It is strange to reflect that they find in the mummies of those who lived so many thousands of years ago the marks of "the city's disease," and the sign of the impure strain. There is a community of sin. What was in ancient Egypt is in the world today and was not invented in any recent time but has been carried on from one human being to another, to many others, and from them to others still.

Consistent Expectation.

"The fashions for women are getting more youthful every year," commented one man.

"Does that meet with your disapproval?"

"Not a bit. If it goes on this way a few seasons more, my wife will be willing to give up her automobile and ride in a baby carriage."

SAN FRANCISCO HOTELS

New law gives title when married prior to June 27, 1906. Remarried widows again a widow also benefitted. Write for blanks. Ask about Confederate service.

BYINGTON & WILSON
Washington, D. C. Established 1866

Oxygenator Is Popular.

We did not have the locomotive, the aeroplane, the submarine, dreadnaught, electric lights, telegraph or telephone, wireless or automobile. These are all recent inventions. Twenty years ago when the automobile came out, we did not have electric lights, top wind shield, demountable rims, electric starters, multiple cylinder, perfected springs and a hundred and one other inventions which make it what it is today. It was nothing more than four wheels and a single cylinder, engine, and a box for a body. Compare, if you will, the highly perfected automobile of today. Those of the better class adopt necessities, but only after the public demands it. The public has shown that it wants the oxygenator on its cars, and it is only by public demand that it will be furnished by the manufacturers.

Most Improbable.

"Do you think there's any truth in the story that Nero fiddled while Rome burned?"
"No," replied the vaudeville manager; "there isn't a musician on earth who would be content to perform on the same bill with so strong a rival attraction as a conflagration."

THE RUNNING LESSON.

I.
Listen to the lesson:
You must climb, although you fall;
Better race a rainbow
Than never run at all!

II.
"Jordan is the hard road—
Hard road to travel."
But if you'd get to glory,
You must rise an' hit the gravel!

III.
Listen to the lesson:
It's the rocky world around,
But the halcyon feeling
Is in gitting' over ground!

IV.
"Jordan is the hard road"—
But—hear the trumpet call:
Better race a rainbow
Than never run at all!

—Frank L. Stanton in Atlanta Constitution.

THERE'S AN Individuality About HOSTETTER'S Stomach Bitters

that makes it especially appealing to those who need a safe tonic, or who suffer from any stomach, liver or bowel trouble

Try it, but insist on Hostetter's

Many Slang Terms of Today Taken From the Vocabulary Of Old-Time Seafaring Men

A great many people use slang terms and expressions without knowing their real meaning or their origin.

Ninety-nine people out of every hundred, when their health is good, say they are "first rate." Why? "First rate" is a seafaring term and was originally used in the classification of the old wooden line of battleships.

"Sailing under false colors"—a term applied to a person who pretends to be other than he is—is a survival of the same period.

This latter expression, like "to throw overboard"—to get rid of something—is obviously nautical; but few people know that "skyscraper" was originally sailors' slang.

"Close quarters" is another very common expression. This, like "first rate" and its accompanying expressions, "second rate," "third rate" and so on, comes from the days of wooden fighting ships. The "quarters" were protection erected along the bulwarks, behind which sailors could lie low and which were used to help to repel boarders.

"To sail against the wind"—to be very much in the minority—and "to lower your sail"—to confess yourself conquered—are both terms borrowed from the sea, and the same may be said of "high and dry" and "laid up" and "spliced," the slang term for getting married.

When we talk of a person being "knocked into a cocked hat" we mean that he was limp enough to be doubled up and carried under the arm like the cocked hat of a naval officer. And we say that so and so will be "on the rocks" if he does not "steer clear" of the money lenders.—Milwaukee Free Press.

A FEW SMILES

Alas, Too True.

"According to this newspaper a brisk business is being done selling imitation diplomas for \$3 each to persons who don't have time to go to college."

"Even if that is true, the possessors of imitation diplomas are vastly outnumbered by persons who have genuine diplomas and bogus educations."

A Real Hardship.

"I went to a summer hotel which advertised all modern conveniences."

"Well?"
"The first day I was there I wanted to write to my wife—to keep a promise, you know."

"And there was no stationery?"
"Plenty of it, but I had to go outside the hotel and look around for half an hour before I found a place where souvenir postcards were sold."

In No Hurry.

"See that girl with a wrist watch?"

"Certainly."
"I guess she carries it around just to show her contempt for time."

"Why so?"
"She's been dawdling for an hour over a sandwich and a glass of milk."

Mistake Corrected.

"I hear your newly married daughter and her husband are going to live with you."

"That's a mistake."

"A mistake? I heard it from good authority."

"A mistake, all the same. They are not going to live with me—they are going to live on me."

Easily Explained.

"Was there ever a case of the office seeking the man?"

"I knew of one."

"Give me the particulars."

"There was no salary attached."

A Kindly Deed.

"Henry, a poor tramp came to the house this morning with his toes sticking out of his tattered shoes, so I gave him—"

"The only extra pair of shoes I had to my name, and they were as good as new. Woman—"

"Softly, softly, Henry. Don't lose your temper. Let me finish what I was going to say. I gave him a little box of foot powder and he said he would never forget my kindness."

Students Build Schoolhouse.

The practicability of the manual training work being taught in many public schools has been demonstrated recently in Las Vegas, N. M. A new building was required to accommodate a department of the normal school. Plans were drawn by the students and a two-story building, 4 by 80 feet in size, was erected entirely by the work of the boy students under the direction of the professor. The building contains all the requisites for manual training work, including a number of electrical conveniences. The work done by the students has saved at least \$5,000 to the city.

CALOMEL SELDOM SOLD HERE NOW

Nasty drug salivates, makes you sick and you lose a day's work.

Every druggist in town—your druggist and everybody's druggist has noticed a great falling-off in the sale of calomel. They all give the same reason. Dodson's Liver Tone is taking its place. "Calomel is dangerous and people know it, while Dodson's Liver Tone is perfectly safe and gives better results," said a prominent local druggist. Dodson's Liver Tone is personally guaranteed by every druggist who sells it. A large bottle costs 50 cents, and if it fails to give easy relief in every case of liver sluggishness and constipation, you have only to ask for your money back.

Dodson's Liver Tone is a pleasant-tasting, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headache, acid stomach or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose a day's work! Take Dodson's Liver Tone instead and feel fine, full of vigor and ambition.—Adv.

The Fire-Brat.

The common silverfish (Lepisma saccharina) is a well-known and troublesome household insect, but its near relative Thermobia domestica, known in England as the "fire-brat," is less familiar. In a recent department of agriculture bulletin on silverfish Mr. C. L. Marlatt calls attention to the curious habit which the fire-brat has developed of frequenting ovens and fireplaces, where it seemingly revels in an amount of heat that would be fatal to most other insects. The writer says: "It disports itself in numbers about the openings of ranges and over the hot bricks and metal, manifesting a most surprising immunity from the effects of high temperature." It was first described in this country in 1873, and began to be noted commonly about 1895 in Europe. It is of about the same size and general appearance as the silverfish, except for some dusky markings.

In the Modern Flat.

Prospective Tenant (dubiously) — "Well, I'd take the place. It has modern improvements and so forth, as you say, but I don't like that ugly crack in the wall over there."

Janitor (hastily)—Crack, sir? Why, that's the private hall!—Puck.

A WOMAN'S TROUBLE.

Now 93 Years Old.

Oakland, Cal.—"For the past 20 years we have used Dr. Pierce's remedies in our family. My aunt, who is now 93 years of age, has used no other medicine and attributes her splendid health to Dr. Pierce's Pleasant Pellets, which she takes regularly. She used Dr. Pierce's Favorite Prescription during the critical time of life. She had been in bed for five years and the doctors said she would never be cured. We certainly recommend these medicines to all women."—Mrs. A. BULLARD, 734 25th Street.

The mighty restorative power of Doctor Pierce's Favorite Prescription speedsily causes all womanly troubles to disappear—compels the organs to properly perform their natural functions, corrects displacements, overcomes irregularities, removes pain and misery at certain times and brings back health and strength to nervous, irritable and exhausted women.

For all diseases peculiar to women, Dr. Pierce's Favorite Prescription is a powerful restorative. During the last 40 years it has banished from the lives of tens of thousands of women the pain, worry, misery and distress caused by irregularities and diseases of a feminine character. What Doctor Pierce's Favorite Prescription has done for thousands it will do for you. Get it this very day from any medicine dealer, in either liquid or tablet form or send 50 cents to Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., for trial box of tablets.

Questions of Sex?—Are fully and properly answered in The People's Common Sense Medical Adviser, by R. V. Pierce, M. D. It contains the knowledge of a young man or woman, wife or daughter, should have. 1008 pages with color plates, bound in cloth. By mail, prepaid—on receipt of 3 dimes or stamps.

BARREL OF APPLES PAID FOR HURLER NOW FAMOUS

That Is All Connie Mack Got for Stanley Coveleskie, Star Pitcher of the Cleveland Team.

Every once in a while the papers used to print a story about a pitcher who was with the Washington club, and who, according to the yarn, had once been traded for a hunting dog. Whether the tale was true or not, it made good reading for the fans.

But Connie Mack has that beaten. The Washington pitcher never amounted to anything as a big leaguer. Connie got a barrel of Oregon apples for one of the present hurlers of the country. And he wasn't even asked if the price was satisfactory.

Stanley Coveleskie, who has been doing great work for Cleveland, got his

Stanley Coveleskie.

first major league trial with the Athletics a few years ago. He pitched three or four games, in one of which he shut out the Tigers.

Connie didn't think the lad was quite ready. So he sent him to Portland, Ore., with a proviso that he could be repurchased. This was very necessary, inasmuch as the Cleveland club, for several years, had had first call on all Portland players.

While Coveleskie was with Portland there was some change in the organization of the club, which involved the making out of new papers. The ownership forgot to protect Mack's claim to Coveleskie, and when the deal was completed Cleveland had a grip on him.

Mack naturally protested, holding that the player belonged to his club, in which he probably was right. But he never got any action. All that he did get was the barrel of Oregon apples, sent to him by the club owners, apparently as a peace offering.

Connie says that a pitcher is a pretty cheap buy at the price of a barrel of apples, even if fruit is away up at this time. Anyone with another Coveleskie to peddle can get a carload of apples from Mack, or from any other manager.

The Royal Way.

Dear laughing eyes, I will not pray
That God shall never send you tears;
That cloudless sunshine, day by day,
Shall brighten all your coming years.

I pray that still through cloud and rain
Your inner depths may hold their light,
And under happiness or pain
You find the Father's meaning right.

Reading in all life's meaning right,
Your title of high womanhood.

Dear girlish hands, I will not choose
The softest, daintiest tasks for you;
God send you strength to give and use,
God send his work for you to do,
The sacred ministry to need,
The round of household toil and care,
The binding up of hearts that bleed,
The girthing up of hearts that dare—
The labor of love's law made good
In royal years of womanhood.

Dear dancing feet, I would not make
Your path all smooth from thorn and briar;
The climbing road be yours to take,
The thorn-set, splendid struggle higher.

God give you still life's springtime zest,
Never content with what is past;
God grant you through earth's weariness
To walk undaunted to the last.

Climbing the steep of hard-won good
To heaven's height of womanhood.
—The New Guide.

To Tell Pure Butter.

In these days when oleomargarine or process butter can hardly be distinguished from the genuine article, it is well for every woman to know a simple test or two that will aid in detecting the genuine from imitation. Pure butter, if melted, should be clear; if it is cloudy, it is the manufactured product. Put a little butter in a spoon, and hold it over a flame. If it sputters and crackles noisily, it is oleomargarine; pure butter bubbles without sputtering.

All Growing Children

are dependent on nourishment for growth. Their health as men and women is largely established in childhood.

If your child is languid, bloodless, tired when rising, without ambition or rosy cheeks, Scott's Emulsion is a wonderful help. It possesses nature's grandest body-building fats so delicately predigested that the blood absorbs its strength and carries it to every organ and tissue and fibre.

First it increases their appetite, then it adds flesh—strengthens the bones—makes them sturdy, active and healthy.

No alcohol or narcotic in Scott's Emulsion, just purity and strength.

SCOTT & BOWNE, BLOOMFIELD, N. J.

Rewarding Italian Soldiers.

A salary scheme is being worked out in Italy, which promises to have good results. Salaries will be paid by employers to their employees, who are on active service the continuation of which will be regulated according to the number of years of previous service. The first clause provides for the reinstatement in their former positions of all employees having served for at least one year with the firm for which they were working at the entrance of Italy into the war. The clauses relating to salaries during the war are as follows: All workmen with the colors who have been with a firm for at least five years are entitled to a third of their usual salaries during the continuation of the war. This applies to married men with families. In all other cases the employers shall pay the men at the rate of a quarter of their former salaries. Men with ten years' service to their credit will receive, if married, with families, one-half of their salaries, and if not married a third. The decree only applies to firms employing at least three workmen.

NEW MODERN DANCING.

E. Fletcher Hallamore, the leading Dancing Expert and Instructor in New York City, writes: "I have used ALLEN'S FOOT-EASE, the antiseptic powder to be shaken into the shoes, for ten years, and recommend it to all my pupils." It cures and prevents sore feet. Sold by all Drug and Department Stores, 25c. Sample FREE. Address, Allen S. Olmsted, Le Roy, N. Y.—Adv.

"Spinster."

The word spinster is a form or variation of spinner, one who spins, meaning an unmarried woman who was supposed to occupy herself with spinning. In its primitive form and meaning the word is of early Anglo-Saxon origin, when no young woman was thought fit to be a wife till she had spun for herself an outfit of personal, table and bed linen; hence spinster or spinster. The fine and sacred word wife (Saxon wif) has a somewhat similar origin in the Saxon verb wifan or wefan, to weave, the weaver being the natural successor of the spinner. There was nothing derivative in the term spinster and it is still used in legal documents to designate an unmarried woman.

Still Sore.

"If you are kind to people they will be kind to you."

"No doubt that is true in the main, but there are exceptions and I hope you won't dwell on the subject this morning."

"Why, what's the matter?"

"I've just been victimized by a fake promoter, and I was as kind to him as I could be."

Dr. Pierce's Favorite Prescription makes weak women strong, sick women well, no alcohol. Sold in tablets or liquid.

New Grecian Harbor.

One of the largest works now receiving the attention of the Hellenic government is the construction of a new navy yard and arsenal at Scaramanga, on the bay of Eleusis, to supersede the present yard, which lies opposite the island of Salamis. This construction is being carried out under the supervision and after the plans of a corps of British engineers. The estimated cost is in the neighborhood of \$15,000,000. It will be several years before it can be completed. It will give to Greece a landlocked harbor for its fleet, with ample facilities for repair work.

Unfair.

"Sometimes I think Henrietta is a little unreasonable," said Mr. Meekton, "Henrietta wears her skirts as short as she likes and I never say a word."

"But you silently disapprove?"

"No. All I object to is her calling me down this morning because my new summer trousers are too lofty around the ankles."

King Coal and Peat.

Southern gas and power producers are watching experiments being conducted in Sweden to determine the value of the use of peat powder as fuel for locomotives. A committee which has conducted several practical tests reports that the value of peat powder as fuel is one-third greater than the fuel value of coal. The cost of peat powder is estimated at \$4.02 a ton compared with the price of coal \$6.03 per ton. The committee has asked in appropriation from the Swedish government of \$350,000 to be used to erect a peat powder factory, acquire peat bogs, and convert the locomotives of one railway line into peat powder burners. There is an immense quantity of peat in the bogs of the South, especially in Virginia and Florida. Some firms have been mining the peat and using it under boilers as fuel with satisfactory results and at a cost far below that of other fuel. It is also pointed out that the raw peat, cheaply prepared, might be used in gas producers. The process to be used in extracting the gas would be very similar to the process used in the extraction of gas from coal. It is thought feasible to place gas works in the peat districts and pipe the gas produced, without loss, for about 25 or 30 miles to gas engines where the power could be converted into electricity for traction purposes.—Wall Street Journal.

"Sometimes," said Uncle Eben, "a man gets de notion dat he's upliftin' de human race when he's only tryin' to boss it around."—Washington Star.

YOUNG WOMEN MAY AVOID PAIN

Need Only Trust to Lydia E. Pinkham's Vegetable Compound, says Mrs. Kurtzweg.

Buffalo, N. Y.—"My daughter, whose picture is herewith, was much troubled with pains in her back and sides every month and they would sometimes be so bad that it would seem like acute inflammation of some organ. She read your advertisement in the newspapers and tried Lydia E. Pinkham's Vegetable Compound. Thousands have been restored to health by this root and herb remedy."

She praises it highly as she has been relieved of all these pains by its use. All mothers should know of this remedy, and all young girls who suffer should try it."—Mrs. MATILDA KURTZWEG, 523 High St., Buffalo, N. Y.

Young women who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion, should take Lydia E. Pinkham's Vegetable Compound. Thousands have been restored to health by this root and herb remedy.

If you know of any young woman who is sick and needs help, write her to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass. Only women will receive her letter, and it will be held in strictest confidence.

WILSON FLEXIBILITY.

We do not see why there should have been any stir in the senate over the discovery that President Wilson has completely reversed himself in the matter of the proposed child labor law. Senator Borah was able to show that Mr. Wilson described this legislation in his "Constitutional Government" as unconstitutional, an "obviously absurd extravagance," carrying the congressional power to regulate commerce beyond the "utmost boundaries of reasonable and honest inference" and making it possible, if sustained, for congress to legislate over "every particular of the industrial organization and action of the country." That, we must confess, has also been the Evening Post's view. But the Evening Post and Senator Borah are old fogies, dating back to the time when it was the custom to have fixed beliefs and principles and stick to them. The senator has evidently not read Mr. Wilson's letter in explaining his change of front on the tariff commission—that it is only a narrow man, whose mind is stupidly closed to new ideas, who does not alter his opinions. By this test Mr. Wilson is obviously one of the broadest minded men this country has ever produced, for he has changed his mind to date on the initiative, referendum, recall, woman suffrage, the tariff commission, tariff for revenue only, a permanent diplomatic service beyond politics, the merit system in the civil service, the proper place of Tammany Hall in the scheme of the universe, child labor legislation, preparedness, Bryan, a continental army—but why continue? It is a long enough list to prove that Mr. Wilson's political views are not fossilized by any fear of inconsistency.—New York Evening Post.

California Weekly Industrial Review

Sanita Ana—\$10,000 carload of walnuts shipped east, banner car for state.

Red Bluff holds \$15,000 bond election Oct. 27 for new playground.

Redding—2,480 ft. tunnel on Anderson-Cottonwood Irrigation project completed at cost of \$49,995.

Los Angeles—New factory to build ready cut house and employ 200 men to be built here at once.

Los Angeles—Work starts on \$500,000 store building at Broadway & 9th.

Carrville—Pacific Dredging Co.'s new gold dredge completed on Coffee Creek at cost of \$475,000.

Circle Is Entertained

The Pundita Circle held its regular meeting at "Fairview," the attractive country home of Mrs. Harry Williams. The afternoon was devoted to a study of Shakespeare. The program follows: Shakespeare's Life, Mrs. Harry Williams; Shakespeare's knowledge of Music and Law, Mrs. Miller; The Love Life of Shakespeare, Mrs. Corning; The Bacon-Shakespeare Controversy, Mrs. Davidson; Words to Songs, Miss Forks; Duet—"Fairy Song," Mrs. Williams and Mrs. Watrous; Scene from "Twelfth Night," Mrs. Miller and Mrs. Beal; Scene from "Merchant of Venice," Mrs. Corning and Mrs. Gill; Scene from "As You Like It," Mrs. Toles and Mrs. Day; Scene from "Romeo and Juliet," Mrs. Nelson.

Mrs. Watrous was the other hostess for the afternoon and assisted in serving dainty refreshments.

Local and Personal

Mrs. C. J. Ludwig underwent an operation for removal of tonsils Thursday morning.

J. E. Olds and J. D. Sawyer were among the visitors at Masonic Grand Lodge Friday evening.

Mrs. A. B. Townsend will entertain the N. and S. Club at her home on Los Gatos road, Monday afternoon.

Mrs. J. J. Vandergon is steadily improving according to last report and may be expected home in a short time.

The H. H. Peak family recently moved to Oakland, E. C. Merrill transferring the household goods by motor truck.

A few pure W. L. hens and pullets for sale at 75 cents each. Thoroughbred cockerels 75 cents to \$1.50, 305 Dillon Ave.

Rubber Over Shoes for the Whole Family and Ball Band Rubber Boots in long and short at E. E. Sower's Cash Store.

Mrs. Andrew Larsen and baby son, and Miss Gertrude Coupland arrived from Westwood, Monday afternoon for a visit with "Dad" and "Ma" Coupland.

The Class rings and pins for the '18 Class C. U. H. S. arrived this week and the Juniors are flashing some very fine jewelry. The design is exceptionally unique and pretty.

Miss Nina M. Farwell is a visitor at the H. A. Watrous home this week. Sunday Mrs. Watrous and little daughter will accompany her to Berkeley for a two week's visit.

Fire, which might have proved serious if not seen early, slightly damaged a room in the Annie Carson home on Los Gatos road where Ernest Barron is living. It started in a defective chimney and a timely pail of water put it out. Some of the fire boys hurried to the scene with chemicals but were too late to be of service.

Now is the time to have H. C. Smith send in your subscription for magazines. 10 Acres—A Bargain, all in bearing prunes. \$4,000, a cash. You can't beat it.

Campbell Realty Co., Sole Agents.

The E. N. Snary family has moved from Quito road to Sunnyside for the winter.

Mr. and Mrs. Geo. Isbell and daughter, Lillian, returned Monday from a five month's stay in Yosemite valley, where Mr. Isbell was at work.

C. J. Ludwig returned home from Delta, Utah, Tuesday. He reports fair crops and a good prospect for next year. He will stay in Campbell until March.

Word has been received from Mr. and Mrs. R. Alison who were at Sacramento. Their next stop is Stockton. Milton Alison is assisting in the bank during his brother's absence.

At the first practice basketball game the local High boys piled up a 49 to 16 score on the Santa Clara High team. The local players were, Kenaedv, Oliver, Huntley, Downing, Duncan, Hoerler and Surtreant.

A party of mighty hunters went to the Gazos in search of ducks and we hear, got their limit. In the party were J. C. Ainsley, J. F. Duncan, J. L. Hagelin, C. E. DeSelle, O. W. Bryant and the three Duncan boys, John, Will and Herb.

Old People's service Sunday morning, Oct. 29.

NEARLY two hundred million dollars were invested in public utilities last year in the State of California.

This is the answer to the criticism that the administration of Governor Hiram W. Johnson drove capital out of the State and discouraged legitimate investment.

The San Francisco Chronicle, which has, in its editorial columns, vehemently made this charge and persisted in declaring that Johnson has frightened the public utility corporations from California, furnished the reply to its own statements on Saturday, October 7th, when it printed an article, which, in part, read as follows:

"An operating revenue of \$384,617,734 was produced by the public utilities of California during the last fiscal year, according to the annual report of the Railroad Commission. The operating expenses were \$249,303,932, leaving a net operating revenue for the year of \$135,313,802. The net operating revenues were \$2,879,708 greater than for 1913, and \$5,710,327 greater than in 1914.

"Additions and betterments and new construction were made during the year by the various classes of utilities as follows: Steam railroads, \$55,048,885.73; Electric railroads, \$15,603,661.80; electric companies, \$56,381,721.59; gas companies, \$10,099,696.72; Telephone companies, \$46,374,853.22; water companies, \$6,999,708.59; total, \$190,508,527.65.

"The Commission claims that considerably more than \$200,000,000 in cash has gone into the further development of California public utilities since the effective date of the Public Utility act in 1911.

"Securities amounting to \$664,000,000 were authorized by the Commission to issue during the period between March 23, 1912, and June 30, 1916. Of this amount, \$359,114,982.57 were issued. The Commission says it has made reductions in rates which total about \$6,000,000 a year and claims that in spite of reductions there has resulted to the utility affected thereby in some cases a decided increase in revenues.

"The report states that 1000 public utilities file their annual reports with the Commission. Of these 329 are water companies, 124 telephone and telegraph companies, 65 steam railroads, 37 electric railroads, 18 steamship lines, 170 gas and electric companies and 183 warehousemen.

"Few States in the Union," says the report, "even with their immense populations have more public utilities subject to State control."

THE primary Election law has been the cause of many heated arguments of late as the result of the recent showing made at the Election in August. Only about 27 percent of the Electors of the state took the trouble to vote at that Election showing that about 83 percent of the citizens did not do their duty as citizens. About the best remedy for such shirks is a temporary disfranchisement. A paragraph should be added to the primary law stating that those who do not vote at the primaries shall not be permitted to vote at the final or November Election. If a man or woman does not care enough about who shall be the candidate of the party, to vote at the primary Election, that person should not be allowed to say who shall be elected at the fall Election.

HON. T. M. WRIGHT, Assembly-man from the 44th, who is seeking a re-election to the legislature, was calling on acquaintances in Campbell Tuesday in the interests of his candidacy. Mr. Wright is making his fight entirely on his record and standing in the district and as this is without stain, his a clean fight. His political card appears elsewhere in these columns.

AS the result of a sympathetic movement throught the country on behalf of the war sufferers, in Syria especially, and the resolution passed by the Senate, July 10, President Wilson has issued the following proclamation.

Now, therefore, I, Woodrow Wilson, President of the United States, in compliance with the said suggestion of the Senate, and the said request of Congress thereof, do appoint and proclaim Saturday, October 21, and Sunday, October 22, 1916, as joint days upon which the people of the United States may make such contributions as they feel disposed for the aid of the stricken Syrian and Armenian peoples.

In Witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Woodrow Wilson,

This is a most worthy cause and the heart-felt sympathy of all who care for their fellowmen goes out to these sufferers. Let your heart express itself in rendering assistance. Subscriptions may be left at the Bank of Campbell, or with Judge Farley.

Congregational Church Notes

The theme of the sermon next Sunday morning will be, "The Power of Request."

The evening service will be devoted to the consideration of the great issues that are just now in the minds of every worthy citizen of our state, the question of putting California among the "White States". At this service three of our men will speak. Mr. Harry C. Smith will speak upon the Purpose and Scope of the Two Prohibitory Amendments. Mr. John F. Duncan will answer the objections that are being advanced against the carrying of these amendments. Mr. C. H. Whitman will tell us how best we may help to secure their adoption. Let each one who is interested begin to help by inviting others to come, especially those who may be in doubt as to their position upon these issues.

A party of fifteen or twenty young people plan to go from this church next Saturday to attend the Christian Endeavor Convention to be held in Palo Alto at that time.

See our new assortment of fountain pens at Smith's.

The new grammar school is almost enclosed and the work of gutting on the far and gravel roofing was begun this week.

Notice to Creditors

Estate of John Troedson, sometimes known as John Troedson, Deceased

Notice is hereby given by the undersigned executor of the last Will and Testament of John Troedson, sometimes known as John Troedson, deceased, to the creditors of and all persons having claims against the said decedent, to file them, with the necessary vouchers, in the office of the Clerk of the Superior Court in and for Santa Clara County, California, within four months after the first publication of this Notice, or within said period to exhibit the same, with the necessary vouchers, to the said executor at the office of L. D. Bohnett, Rooms 313-314 Bank of San Jose Building, in the City of San Jose, County of Santa Clara, State of California, where all business connected with said estate will be transacted.

San Jose, Cal., this 13th day of October, A. D. 1916.

Executor of the last Will and Testament of John Troedson, sometimes known as John Troedson, Deceased.
L. D. Bohnett, 1st pub 10-39-16
Attorney for said Executor.

Some Boomerang

In 1913, to select a year for illustration, according to figures given out by the wine people, there were 42,000,000 gallons of wine produced in California. Had the State been under prohibition, such as is provided for in Amendment Number 1, that wine could not have been made. Mr. Madison and those with whom he is identified state that the second measure would have the same effect upon the wine industry as Amendment Number 1. Therefore, according to Mr. Madison, had the second measure been the law in 1913, that wine would not have been made.

And here Mr. Madison and his group are mistaken.

Does Not Limit Production.
To begin with, the second measure does not limit or interfere with the manufacture of wine in any way.

So the 42,000,000 gallons of wine would have been manufactured in 1913, had the second measure that year been in force.

The wine people state that of the 42,000,000 gallons made in California in 1913, 40,000,000 gallons, more than 95 percent of it, were exported from the State.

Could Have Been Exported.

The second amendment does not interfere with the exportation of wine or its free movement in quantities of two gallons or more. So the 40,000,000 gallons would have been manufactured and exported even though the second measure had been the law.

This disposes of all but 2,000,000 of the 42,000,000 gallons, less than 5 percent of the whole, which, according to the wine men, were manufactured in California in 1913.

A considerable quantity of the 2,000,000 gallons was stored.

The wine stored would not have been affected in the least had the second measure been the law in 1913, for the second measure does not interfere with the storage of wine.

Private Consumption.

Much of the 2,000,000 gallons was consumed in homes and private places. This would not have been affected had the second amendment been the law of the State in 1913, for the second amendment does not interfere with the consumption of wine in homes and private places.

For Sale: Brooder houses, second hand lumber, chicken wire, rabbit drinking and feeding pens. Pure bred Rhode Island roosters. H. W. Higbie, Campbell and Johnson avenues.

TAXES 1916

OFFICE OF THE TAX COLLECTOR, COUNTY OF SANTA CLARA, CALIFORNIA

San Jose, California, October 2, 1916.

NOTICE IS HEREBY GIVEN that the Taxes for the Year 1916 will become due and payable:

FIRST INSTALLMENT. Taxes on all personal property, a lien on or secured by land, and one-half of the taxes on all real property will be due and payable Monday, October 16th, 1916, at six o'clock P. M., when 15 per cent will be added to all of said first installment remaining unpaid.

SECOND INSTALLMENT. The remaining one-half of taxes on all real property will be due and payable January 1st, 1917, and delinquent April 30th, 1917, when 5 per cent will be added to all taxes remaining unpaid.

Taxpayers may, if they desire to do so, pay the whole tax at one payment.

For the purpose of receiving taxes I will be at the several townships of the county as follows:

CAMPBELL

At the Bank of Campbell, in the Town of Campbell, on Friday, October 27, 1916.

And at my office in the Hall of Justice Building, cor. St. James and Market Streets, San Jose, California, daily, Sundays and Legal Holidays excepted, from 9 A. M. to 5 P. M., and on including Monday, December 4th, 1916, and Monday, April 30th, 1917, at 6 o'clock P. M.

The Second installment is payable at my office in the Hall of Justice Building, San Jose.

THOMAS BODLEY,

Tax Collector of Santa Clara County.

Catarh Cannot Be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarh Cure is taken internally, and acts directly upon the blood and mucous surface. Hall's Catarh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarh. Send for testimonials, free.
